— **ENGIMACH** 2015 —
creating global opportunities
3 DECEMBER - 7 DECEMBER

**We would have
crawled on this earth
for a lot longer than
we have walked
on it, if we had not
shown desire to
invent, adopt, sustain
and survive.**

The evaluation of man has been the subject of intensive investigation for centuries since Darwin has provided the foundation with his theories.

Using tools has been interpreted as a sign of intelligence, and it has been theorized that tool use may have stimulated certain aspects of human evolution-most notably the continued expansion of the human brain.

The use of stones is believed to be the first ever used tool as the simple tool for hammering, which became a stepping-stone towards evolution of more and more tools of its kind.

This tool-making tradition lasted virtually unchanged for a million years. Tools were made by breaking an angular rock with a "hammer stone" to give simple, sharp-edged stone flakes for chopping and slicing.

Making sparks while hammering stone is common. This tool led to fire making. Humans were no longer dependent on nature sources of fire and that ignited the desire to evolve.

This tool also led to invent wheel, the most crucial invention of mankind responsible for today's modern technological development.

The way humans make and use tools is perhaps what sets our species apart more than anything else. Now scientists are more and more uncovering the forces that drove our lineage to our heights of tool use — and how tool use, in turn, might have influenced our evolution.

A silhouette of a man walking across a beach at sunset. He is carrying a large, dark, textured bundle on a shoulder pole. The sun is low on the horizon, creating a bright orange and yellow glow that reflects on the water and the wet sand. The man is walking from left to right, and his shadow is cast on the sand.

Gain from
the past

**For a million years
we keep staring in
the sky with utter
curiosity. Imagine
today the men who
took years to travel
across the cities are
moving towards
the farthest in the
universe**

The word “technology” encompasses meaning: tools and instruments to enhance human ability to shape nature and solve problems (such as a hammer and nail), knowledge of how to create things or how to solve problems (such as to brew coffee or to make an atomic bomb), and culture (our understanding of the world, our value systems).

Historically, the emergence of human civilization has been closely connected to the development of tools for hunting, agriculture, irrigation and water management, and navigation.

It is evident that technology touches each and every facet of our lives. Be it the way we live or the way we work, be it the way we learn or the way we travel. Technology today is the most important part of our existence.

Life is hard to imagine without technological innovations and engineering. We use them every day, and we are doing it for a very long time. Our ancestors made the first stone tools at least 2.5 million years ago, long before modern humans evolved. Since then, our ability to invent has taken us far beyond our basic need for food and shelter. Yet many of the tools we use today spring from old traditions. We often innovate by learning from the past.

A person wearing a white protective suit, possibly a hazmat suit, is walking across a desert landscape at sunset. The sky is a deep orange and yellow, and the cityscape of Dubai is reflected in the sky, creating a surreal, inverted effect. The person is walking towards the right side of the frame.

**sync with
the presence**

**The fabric of future
will be woven
by thousands of
innovations, millions
of minds and endless
desire to evolve into
much better human
version.**

**Will it be call the rise
of machines or rise of
mankind.**

Present trends and developments are projected into a story about what the future might look like and how we might get there. It may need a “deep change” processes in individuals, institutions, society, values, and very likely technological developments.

Developing the “right” future depends both on far-sighted and entrepreneurial individuals and on a deep insight in technological opportunities and societal consequences. Appropriate technologies and traditional and indigenous technologies have proved to be of enormous value for the development of a new technological paradigm. The combination of early twenty-first century high-tech developments with the principles embodied in appropriate technology, and the knowledge and wisdom of traditional technologies

**Japan, Germany, USA, UK, Austria, Italy
Spain, Canada, Switzerland, Netherlands, Australia
Singapore, Taiwan, Korea, China, Hongkong,
Thailand, Malaysia, Vietnam, UAE, Turkey, Egypt,
Poland, Czech Republic, Ukraine**

ENGIMACH has always delivered more than promised and has achieved more than expectations. Being the most reputed and trusted technology show in India, with recent edition of ENGIMACH, all set for setting higher benchmarks. ENGIMACH 2015 will continue the legacy of success with incorporating more and more international participation.

ENGIMACH 2015 is expecting more than 2000+ company participation from more than 25 countries and it will be held at massive 1,00,000+ sq mtr exhibition area. Yet another leap forward towards becoming a true international event.

ENGIMACH 2015 is dedicated to technology and innovations. It will witness the never seen before products, processes, technology, emerging innovations, active participation of automobile companies, knowledge sharing and exchange with world leaders, investment opportunities and business tie-ups.

2th

edition (1997 to 2015)

Seventeen years of partnership, trust and success

ENGIMACH

When one technology becomes obsolete, it is replaced with a different, better technology. Technology needs constant evaluation. It is important for companies to be in tune with future's need than rely on yesterday's block buster.

ENGIMACH is not just a show to trade but it is a platform to see, understand and learn where the industry is heading to.

important dates

Payment Schedule	
50% Down payment	Against Booking Confirmation
Balance 50%	Before 30th October, 2015
Participation Cancellation Charges	
25% of total participation cost	30th March, 2015
50% of total participation	30th June, 2015
75% of total participation	30th October, 2015
Other Important Dates	
Exhibitors product profile for participant directory	30th October, 2015
For final payment	30th October, 2015
To submit additional service requirement form	30th October, 2015
Specification of loading/unloading	30th October, 2015
Stall possession (Bare space)	1st December, 2015
Stall possession (Shell Type)	2nd December, 2015
Exhibit removal	7th December, 2015 (After Exhibition) 8th December, 2015 (Before 11 am)

(Delay payment penalty)
After due date ₹ 1,000/-
per sq mtr per week
Final Payment 30th
October, 2015

Deadline to complete exhibit transfer and stall decoration before 9 p.m. on 2nd December 2015. Transfer of material/goods will not be allowed during exhibition

participation cost

Participation Cost		
	Standard Booth (per sq mtr)	Bare Space (per sq mtr)
Indian	₹ 12,650/-	₹ 11,500/-
Foreign	\$ 300	\$ 275
Dealers/ Agency	₹ 13,800/-	₹ 12,650/-

Security Deposit: ₹10,000 (Refundable)

Standard Booth:

The smallest stall (booth) size is 9 sq mtr (3m x 3m with standard facilities)*

Standard Facilities Includes: Participation charges cover position, fascia with the exhibitors name, two chairs, one table, one dustbin, carpet flooring, etc. Electricity charges for three spot lights and one 5 amp plug. One copy of the exhibitors Souvenir, three exhibitor badges on every 9 sq mtr stall. The Organizers will arrange general security for the exhibition hall, and insurance coverage of the exhibition halls in general.

Bare Space:

The smallest stall (booth) size is 36 sq mtr (6m x 6m)
(Exhibitors have to construct their own designed stall)

Premium Space cost:

2 Sides Open 15% Extra | 3 Sides Open 25% Extra | 4 Sides Open 30% Extra

additional requirement cost

Additional Requirement - Compressor				Power	
	3 CFM with 100 psi (per connection)	6 CFM with 100 psi (per connection)	10 CFM with 100 psi (per connection)		3 Phase Power (per HP)
Indian	₹ 12,500/-	₹ 16,500/-	₹ 20,500/-	Indian	₹ 3,000/-
Foreign	\$ 300	\$ 400	\$ 500	Foreign	\$ 100

Delivered more than what was promised...
Achieved more than what was expected...
The most reputed and trusted name in exhibition
organizers in India.

K and D's journey is driven by values; those which have led us this far and which will lead us further ahead. We at K and D practice ethical value-based conduct in business. K and D is actively involved in organizing national and international level trade fairs and exhibitions for a diverse industry spectrum. It is also one of the most reputed name in India. K and D has been known for connecting the dots together... dots that mean dreams values, success, growth and future.

With a humble beginning in 1997, with just a few companies and a strong desire to be the best in the business, today K and D Communication has earned its name as India's leading exhibition organizer with a tremendous success story.

Through committed endeavor and a no-compromise attitude to quality, K and D Communication Limited is on a drive to expand the scope of exhibitions – to expand to truly global platforms. K and D offers an ideal launchpad for new ideas, products and services, conducive platforms for forging joint ventures and

collaborations and open marketplaces to source ideal solutions. In sum, K and D Communication is opening the doorway to the global marketplace.

Through its worldwide networking, pre-emptive planning and execution, intelligent space management and meticulous control of macro and micro level logistics, the group ensures that every participant gains from such platforms. The extraordinary care that goes into every aspect of the event and the gains that participating companies have garnered in real terms, have made K and D Communication a permanent name in corporate calendars of hundreds of companies across India and abroad.

K and D Communication has taken an initiative to build India's largest, technologically superior, ultra-modern and state-of-the-art exhibition center. The Exhibition Center in Gandhinagar, Gujarat will have 1,02,000 sq mtr of exhibition & convention area for hosting large scale exhibitions and trade shows.

Knowledge and expertise are two keys that open the door to success. The Journey to Success isn't easy enough, it needs a great amount of dedication, commitment and continual efforts. Our journey began with a dream, connected to our values, earned us trust, made us an expert and finally we tasted success.
