The four-day-long IDF WDS 2022, held from 12th to 15th September, is a congregation of global and Indian dairy stakeholders including industry leaders, experts, farmers and policy planners centring around the theme of **'Dairy for Nutrition and Livelihood'**. The last such Summit was held in India about half a century ago in 1974.

The Indian dairy industry is unique because it is based on a cooperative model that empowers small and marginal dairy farmers, especially women. Driven by the vision of the Prime Minister, the government has taken multiple steps for the betterment of the dairy sector resulting in an increase in milk production by more than 44% in the last eight years. The success story of the Indian dairy industry, accounting for about 23% of global milk, producing around 210 million tonnes annually, and empowering more than 8 crore dairy farmers, was showcased at the IDF WDS 2022. The summit also helped Indian dairy farmers gain exposure to global best practices.
